Profile

I am from the generation that started off programming with Commodore 64 and ZX Spectrum 128 (& Sony MSX). I mainly write in C#. I'm a big fan of cross-platform mobile development. Although I have professionally coded since 2003, I only started making games as part of my role as CTO at HeartBoxGames in 2015 and have fallen in love with it since. However, I still work on engineering and enterprise software projects and services.

I mostly use Unity3D for games development and .Net Core/Xamarin/VS.net for enterprise apps.

I am also familiar with different cloud services (mostly MS Azure and Google Cloud Platform)

My main fields of interest are in mobile gaming, mobile applications, Blockchain and Fintech, IoT and e-Health, robotics, Big Data, Machine Learning, Logistics and rail transport and last but not least, Entrepreneurship.

Employment History

Lead developer and CTO, HeartBoxGames

Sep 2015 – Sep 2018 📍 Cannes Area, France

In HeartBoxGames and in 2 years, we have created more than 30 game concepts and around 10 of them are published either under our name or international publishers. These games have been downloaded for more than 200k times (until september 2018). The technology we use is mainly Unity 3D/C#.

responsibilities:

As Lead Developer (70% work load)

General and Game Programming + Writing automated tests (NUnit/ a little of NSpec)

Pair Programming and Code reviews

Mentoring apprentices and junior developers

Preparing and packaging finished code as reusable modules

As Project Manager / Product owner (15% work load)

Project Management (1-2 teams of 3 to 6 for more than 20 projects)

Product Management (+10 projects)

As CTO (15% work load)

Enterprise Architecture

Choice of stock of technologies for the company (Backend/Frontend/DevOps)

Company's technical roadmap

Choice and implementation of KPIs and Analytics tools

Implementing continuous improvement

implementation of Lean Enterprise and Scrum+Kanban methodology

Technical Project Manager, Pars Kaghak Rayaneh

2009 – 2010 📍 Tehran, Iran

Leading a small team of junior engineers in delivering a high quality product from scratch.

Responsibilities:

- requirement analysis
- negotiation with clients
- working as lead developer on the project
- project and team management
- delivery of the final product
- technical support

Chief Technical Officer, Pooyesh Gostaran Tarabar

2007 – 2010 📍 Tehran, Iran

Pooyesh Gostaran Tarabar was a sister company to Pars Kaghak Rayaneh. It used to market and implement fleet tracking services based on INMARSAT D+/C when cellular network was not that reliable and smartphones didn't exist. Our clients were some of the biggest carriers and forwarders in Iran and central asia.

Responsibilities:

- National and international negotiations with clients and sources
- Requirement analysis
- Creating a total solution for fleet management

Programmer, Pars Kaghak Rayaneh

2003 – 2008 📍 Tehran, Iran

Starting as a junior QA technician, I soon evolved into creating unit tests and a bit later with the adaptation of TDD in PKR, became programmer. Being at ease with electronics, I also worked on projects dealing with interfacing legacy systems with newer services as well as creating monitoring interfaces (for example an electronic dashboard to check our servers' health and sending sms notifications if something went wrong). This era was when the cornerstone of my programming career was laid as I had the opportunity to work closely with some of the brightest minds in the business.

Education

Ecole Nationale Supérieure d'Arts et Métiers (ENSAM), Engineering diploma

2013 – 2016 📍 Paris, France

General Engineering in France tends to form multi-disciplinary engineers with not only deep understanding in many engineering fields (Mechanical, Industrial, Materials, Electrical and IT to name a few), but also managers and leaders able to coordinate, supervise and lead experts in different domains in order to achieve the intended goal. There are very few establishments in France who are permitted to issue this degree and they are very selective. This type of diploma is very highly regarded in France.

Université Lille 1, Master 1 - Automatique et Systèmes Electrique

2012 – 2013 📍 Villeneuve d'Ascq, France

Having chosen Controls and Electrical systems for my master's degree, I ended up 2nd in overall ranking.

Université Lille 1, Bachelor of Engineering -Electrical Engineering

2010 – 2012 📍 Villeneuve d'Ascq, France

Back to school, I started studying electrical engineering in France and in french. The first part of these studies was a reminder of what I have learned back in Iran. But this time, I knew the importance of hard work and concentration. Although my colleagues were on average 10 years younger than me, I finished in the top 5 of our faculty.

Islamic Azad University, Associates degree - Electrical Engineering (Telecommunications)

1997 – 2002 📍 Shahr-e-Rey, Iran

Pet Projects and Proof of concept

PoC :Distributed ledger blockchain service

Sep 2018 – Present 📍 Paris, France

Aspire and Lead is a very young financial startup in Paris. The President, a great friend of mine had asked me if we can have a proof of concept on a small part of their business model. The project is being developed using Xamarin and uses Azure Cloud as backend

PoC : Expert consultant chatbot

Sep 2018 📍 Mandelieu - La Napoule

This is a chatbot i'm developing to help people who are considering immigration (study or work). It is in persian and uses Microsoft chatbot framewok, Xamarin, Angular and NLP.

PoC: Food Delivery Service

Oct 2018 – Oct 2018 📍 Mandelieu - La Napoule

Virtual Gallery

Jan 2017 📍 Nice, France

As a showcase for big touchscreen computers from UPSILON GROUP, I have created a virtual gallery and voting system for 'Art and Leadership' Exposition – Version 2016/2017 – Université de Nice
The virtual gallery is created using WPF
